**30** YEARS represents our experience and interest in Designing, Engineering and Manufacturing of Commercial, Industrial and Residential lighting fixtures. Naturally, with these resources to draw upon, affords us an excellent opportunity to contribute our share to the progress of Better Light For Better Sight.

Many hours of study and development were required to produce this new line of lighting fixtures, as full size models were made of each fixture in order to acquire the ultimate in design, finish and quality for proper illumination.

In presenting this book to the jobber and dealer, we have endeavored to provide him with a selling aid that will not only assist him in securing more business but on a highly profitable basis. Please read each item under title for SPECIFIC INFORMATION and INSTRUCTIONS, as its purpose is to conserve your time and avoid any misunderstandings.
